

DMT Geosciences Ltd. (DMT) offers a full range of services in exploration, engineering, and environmental geophysics. In Canada, DMT operates from offices in Vancouver and Calgary.

DMT Geosciences Ltd. has more than 35 years of experience acquiring, processing, and interpreting near surface geophysics for engineering, environmental, and resource development work. Our clients include major oil and gas companies, international engineering companies, mining companies, and governments at all levels.

At DMT Geosciences Ltd., based at our location in Calgary, we are currently seeking to fill the following position: **GEOPHYSICAL FIELD TECHNICIAN (CASUAL,PART TIME)**

The responsibilities of this position will include:

- Conduction of geophysical surveys including seismic refraction, seismic reflection, electrical resistivity imaging, electromagnetics, gravity, magnetics, and ground penetrating radar.
- Coordination with other disciplines during field operations.
- Conduct field-level quality control of geophysical data.
- Fulfil field level HSE requirements.

The ideal candidate will have:

- Willingness to work outdoors for extended hours (up to 10 hours) in a variety of weather conditions (including arctic conditions) and environments.
- Willingness to spend a significant portion of the year in the field.
- Previous field experience in geophysics or a related discipline is an asset.
- Valid driver's license.
- Adaptability and the ability to improvise to achieve objectives with minimal supervision.
- Strong written and verbal communication skills.

We will provide:

- Training on all the above described geophysical surveys.
- Necessary safety qualifications.
- Continuing support from senior geophysicists
- Support towards the acquisition or maintenance of professional designation with APEGA, APEGBC, or APEGS.

Why you should choose us

- Competitive remuneration packages
- With DMT you will be a part of a supportive, young, dynamic team
