

## **DMT Geosciences Ltd. – Now Hiring**

**Position: Geophysicist – Mining & Energy**

**Location: Calgary, Alberta (must reside locally)**

DMT Geosciences Ltd., part of the globally respected DMT Group and TÜV NORD GROUP, provides expert geophysical consulting services to the mining and energy sectors across Canada and around the world. Backed by over 280 years of international expertise, our team blends deep technical knowledge with practical field experience to deliver innovative solutions to our clients.

We are expanding our Calgary-based team and are seeking a Geophysicist – Mining & Energy who is passionate, driven, and ready to take their career to the next level.

### **Your Key Responsibilities**

As a core member of our technical team, you'll lead and contribute to a range of exciting projects across both mining and energy geophysics:

- **Business Development:** Drive growth through strategic proposal writing, client engagement, and support for marketing and sales activities.
- **Project Management:** Plan and execute geophysical projects (multiple methods) from start to finish.
- **Field Acquisition:** Lead and supervise field programs both in Canada and internationally— including challenging environments such as remote regions, arctic conditions, and underground operations.
- **Data Analysis:** Process, interpret, and report geophysical data with clarity and precision.
- **Client Liaison:** Communicate effectively with clients, stakeholders, and multidisciplinary teams to ensure project success.

### **Qualifications & Skills**

#### **Education & Experience:**

- Minimum Bachelor's degree in Geophysics, Earth Sciences, or related discipline (required); Master's degree (preferred)
- Minimum 8 years of experience in applied geophysics within the mining and/or energy sectors
- At least 4 years in business development or client-facing roles
- Registered or eligible for registration as a P.Geom or P.Geoph.

#### **Required Skills:**

- **Excellent spoken and written English** communication skills (essential)

- Strong industry connections with both junior and major resource companies
- Demonstrated leadership in both field and office-based environments
- Strong organizational and analytical abilities
- Ability to travel nationally and internationally for field assignments
- Must hold a valid driver's license
- Must reside in the Calgary area

### **What We Offer**

At DMT Geosciences, we know that great people build great companies. That's why we invest in our team and offer a workplace where your contributions truly matter.

- **Competitive Compensation:** A strong base salary, performance incentives, and comprehensive benefits package.
- **Professional Growth:** Funding and support for professional development, conferences, technical training, and certification.
- **Meaningful Work:** Be part of impactful projects shaping the future of resource development across Canada and internationally.
- **Collaborative Culture:** Join a motivated team of geophysicists and engineers who work hard, support each other, and celebrate success together.
- **Work-Life Balance:** Flexible scheduling options, vacation allowance, and a culture that respects personal time.
- **Global Network:** Engage with an international team of geophysicists across three continents within the DMT Group.
- **Tools & Tech:** Access to modern geophysical equipment, software, and technology to deliver cutting-edge results.

### **Why Choose DMT Geosciences?**

- Work with one of the world's most experienced geoscience organizations
- Apply your expertise on challenging, high-impact resource projects
- Join a company with a reputation for integrity, technical excellence, and innovation
