

Launch Your Geophysics Career with a Global Leader

Position: Junior Geophysicist – Mining & Energy

Location: Calgary, Alberta (must reside locally)

Are you a recent or pending geophysics graduate ready to put your skills to work on meaningful, real-world projects? DMT Geosciences Ltd., part of the globally recognized DMT Group and TÜV NORD GROUP, is looking for a Junior Geophysicist to join our Calgary-based team.

DMT has over 280 years of geoscience leadership and a footprint across 30+ global locations, delivering cutting-edge solutions to the mining and energy sectors. If you're excited by the idea of fieldwork, innovation, and working with experienced professionals around the world, this is your chance to start your career with purpose.

Your Role and Responsibilities

As a Junior Geophysicist, you will gain hands-on experience while contributing to diverse exploration and engineering geophysics projects. You'll work alongside senior team members to learn, grow, and make an impact.

- Assist with field acquisition of geophysical data using a variety of methods and technologies
- Support data processing, analysis, and interpretation under supervision
- Contribute to technical reports, proposals, and client deliverables
- Participate in field logistics and equipment setup, both locally and abroad
- Collaborate with team members and assist in ongoing project planning and execution

What We're Looking For

Education:

- Bachelor's degree in Geophysics, Earth Sciences, or closely related field (required)

Skills & Attributes:

- Strong written and verbal English communication skills (essential)
- Solid understanding of geophysical principles and methods (land and airborne methods an asset)
- Enthusiasm for fieldwork in remote and varied conditions, including winter, mountainous, and underground environments
- Technically curious, safety-conscious, and eager to learn
- Detail-oriented with a proactive mindset and good problem-solving skills

- Must be based in Calgary and legally eligible to work in Canada
- Willingness and ability to travel for extended field assignments, both nationally and internationally
- Valid driver's license

What We Offer

At DMT Geosciences, we provide new graduates with more than just a job — we provide a launchpad for a rewarding career in applied geophysics:

- **Hands-on Training & Mentorship:** Learn directly from experienced geophysicists who are leaders in their field
- **Early Career Development:** Exposure to a wide range of projects, geophysical methods, and international work environments
- **Real Field Experience:** Get out of the office and into the field — from Canadian mine sites to international energy projects
- **Career Growth Pathways:** Structured support to pursue P.Geol or P.Geoph. registration and build a long-term professional career
- **Competitive Salary & Benefits:** Strong entry-level compensation, extended health and dental benefits, and travel per diems for fieldwork
- **Work-Life Balance:** Flexible schedules and time-off policies designed to support your overall well-being
- **Global Exposure:** Collaborate with geoscientists across North America, Europe, and beyond as part of the DMT Group's international network

Why Start Your Career with DMT Geosciences?

- Be part of a tight-knit, high-performing team in Calgary with the backing of a global leader in geoscience
- Build experience that spans mining, energy, engineering, and environmental sectors
- Join a culture that values innovation, learning, and work that matters
